

COVID Updates

Due to the recent rise in California COVID-19 cases Governor Newsom has advised more closures of indoor businesses like bars, restaurants, gyms, and nail salons. However, dental and medical offices are classified currently as essential businesses and will not be expected to close anytime in the near future.

Our office has taken the following measures listed below to ensure continuous safety in our practice for our team and our patients:

- We are sending COVID screening forms in advance for submission by patients and temperatures are taken at the door before entering our office for all patients and parents
- Patients are asked to wash hands and use our antibacterial mouth rinse every visit prior to being seen in the clinical areas
- Masks are required at all times inside our office
- Patients have limited access to all treatment areas
- We are following social distancing protocols in both the office reception area and all treatment areas
- We have added air purifying systems throughout the office
